the Smartness of these three interesting Styles

The spirit of luxury radiates from this stunning model, developed in rich **all wool Poiret twill.** Embroidery, which never for a moment has lost its charm, is here skillfully worked in fiber silk and tinsel threads in such tasteful colorings and intricate design that you will find it unlike any dressy cloth frock you ever had. By catching up the slight fullness at the left and holding it with a handsome metal ornament, the approved draped effect is acquired. The decidedly flaring, deeply slashed cuffs are lined with handsome all silk satin as is also the graceful flowing panel. Dress fastens at left and has batiste waist lining. Considering the superb quality of this dress, you will find it a remarkable value, indeed, for $22.50. **Dresses of this kind ordinarily sell in fine stores throughout the country for about $30.00 to $35.00.**

An evidence of good tailoring is found in the inverted plaits at sides of skirt. **A truly low priced and becoming frock for everyday wear.**

Lending emphasis to the contrast we have panels on waist front and back of velveteen, while the modish deep slashed cuffs are also of this lovely fabric. **A very dressy frock.**

This trimming is also used upon the straight line back. The 30-inch coat is lined with good quality satin de chine. The Women of America Gave Us the Name

"The Place to Buy Corsets"

On every hand you hear, "Send to Sears Roebuck for your Corset."

Ours is by far the largest assortment of sizes being sold direct to wearer, including many patented corsets of great merit which cannot be secured elsewhere.

Every corset we sell is guaranteed non-rustable, and we furnish a full length, good quality lacer with each. Each corset is carefully packed in its own individual box (no flimsy bags, no handled over, loose stock garments). Your order will be shipped at once.

And Values! We buy from many of the well known corset factories, under our own brands, in such tremendous quantities that we are able to give you prices astonishingly low. We have added some more great values. For example, model 18N347 below is priced at $3.69, under our C. H. & S. Brand, while under a famous advertised brand it sells in corset shops at $5.00 to $6.00. Furthermore, we have every size and, if your corset does not fit, we will exchange it or return your money. For your next corset, send to us.

While the belt is effectively performing its functions, the outside apron comes in a smooth line from bust to hose supporters. The stylish skirt is sufficiently long to cover the fleshy parts and to prevent any sharp line or ridge from appearing. Our Famous

with Woven Boning

These famous corsets have become great favorites and are regularly purchased by thousands of customers because they are very comfortable, yet give excellent support.

The extraordinary boning is made of fine rust resisting galvanized wire, woven so that it bends in any direction with every movement of the body, without turning in the stay pocket. Note the illustration below; see how it bends. It affords perfect freedom, combined with good support. Until we introduced corsets with this boning on a large scale at our low prices, they were sold mainly by manufacturers' representatives direct to the wearer at very high prices.

Ever-sta

Ever-Sta Corsets Are the Most Economical for Stout Women, Because They Are the Cheapest in the Long Run.

The strongest made corsets we have ever handled. The special features include strong interlinings and bone stripping, large sections of fine heavy elastic, and strong rust resisting boning wire (triple strength where needed). Then, the Ever-Sta construction, a special patented process, whereby the strong yet resilient boning does not twist or come out of the stay pockets, and the stripping (bone covering) will not wrinkle and cause discomfort. Large sections of strong wide elastic at top give that freedom and expansion so essential above the waistline for the stout woman; while the double cloth reducing and supporting sections across front, together with the heavy elastic at bottom back, comfortably mold the flesh, giving modish lines. The front lacing model, as is usual, has only one piece of elastic in bottom back, instead of two as in back lace models. Made strongest where the strain comes and heavily boned. All sizes from 24 to 30; also even sizes, 32, 34, 36, 38, 40, 42 and 44. **Be sure to state corset size.** Shipping weight, 2 pounds.

A Proven Help to Womankin

Most Tru-Lift Models now have the patented Flexo Comfort Top; allows perfect freedom in bending.

DOCTORS RECOMMEND THEM

The Prof. Dale Tru-Lift Corsets

Truly wonderful corsets for all women requiring correct abdominal support or reducing. The patented inner belt gently lifts the abdomen and holds it in its natural place without discomfort, thereby assisting nature in bringing permanent relief. When laced, the inner belt is hidden from view. It cannot slip out of place or cause discomfort. It does not gouge when sitting or cause the sensation of slipping down under garment. Each half of the belt is provided on the lower front edge, inside the fabric, with a thin, light weight aluminum plate. These plates are easily bent to fit the wearer's requirement and cup up under the abdomen, exerting a strong but gentle upward and inward pressure. They hold their shape and give firm and restful support. Easily adjusted to all figures.

Doctors order these Tru-Lift corsets for patients recently operated upon, for women who are suffering from abdominal troubles and for mothers after childbirth, to better restore the figure to normal. Hundreds of testimonials have been received telling of the great relief the Tru-Lift corset brings.

Until we brought out these Tru-Lift Corsets at our low prices, women requiring such support were forced to pay exorbitant prices for corsets of far less value.

The Tru-Lift corset brings positive reduction to women who have large, fatty abdomens. Some women have reduced as much as eight inches in waistline, and this was done with the utmost comfort. Dressmakers recommend this corset, for it is easy to fit garments over and get the stylish lines.

The Tru-Lift corsets are now made in front lacing as well as the back lacing models, to care for every figure. Splendidly made on stylish lines of strong coutil, correctly boned. Handsomely trimmed. Fitted with extra strong, securely attached supporters. Comfortable elastic sections in bust. Stays made secure by patented fastening. Worth many times our prices in the comfort and wear they will give. Not only health giving corsets, but garments of style as well. All lacers are included. **Order your regular corset size.**

Take your waist measure over the corset you are wearing and deduct 2 inches for spread of laces. Please order by the **corset size** and not by actual waist measure.

Restful Support.

The two aluminum support plates fitted in the inner belt are so made that they can be bent into just the right shape to comfortably support each individual wearer. The support they give when laced is like the lift with fingers of the hands—true comfort.

The Need of the Tru-Lift Corsets.

Seven of every ten women suffer ailments caused by weakness of the abdominal walls and the settling or sagging out of place of the internal organs. The Tru-Lift gives the needed support. Not a clumsy, heavy affair, but a light weight, stylish and comfortable corset which scientifically supports the inner organs in their natural position, yet retains all the style of the fashionable corset.

The demand for these fine Corsets is increasing. Reasons?

Perfect Fit! Long Wear! Big Value!

We Guarantee

To replace within six months from date of purchase styles 18N101 and 18N103 should the fabric split or tear, the bones break or rust, or if because of any defect in material or workmanship the corset does not give good wear.

Our Guaranteed Corsets are splendid fitting garments, developed upon hygienic and scientific principles, whereby the internal organs, abdomen and back are given proper and healthful support and the figure sensible, natural lines—the very essence of today's fashion demand. And they are big values, too, being made of a very fine quality, firm pink coutil, with strong elastic set in the skirt of each where needed. A lot of hidden value in the way of strong innerlinings and fine double strength boning (even triple strength where needed) cannot be seen from the outside, but it is this good foundation, however, which enables us to make our liberal guarantee. Six strong hose supporters. Dainty embroidered trimming. We have a model to care for all average figures in both front and back lacing style. We include with each garment a good long lacer and instructions for putting on your corset. **Order your corset size 2 inches smaller than waist measure taken tight over your corset. State your corset size.** Shipping weight, 1 lb. 9 oz.

Dr. Johnson's COMFORT SHOES

MAKE WALKING A PLEASURE.

Our many years of study and experience teach us that many of our ailments are due to the wearing of improper shoes. To relieve men with "cranky feet" of their foot troubles we have designed these shoes with a special cushion innersole built right into them that takes the jar out of walking. We have made them with GENUINE GOODYEAR WELT soles that allow flexibility such as cannot be found in ordinary shoes. The jar absorbing rubber heel is an added feature for comfort. Uppers are all of black genuine vici kid leather that permit the feet to breathe.

Dr. Johnson's Comfort Shoes are made exclusively for us and can be bought from us only. Ordinarily shoes of this nature are sold for from $1.00 to $3.00 more than we ask here and we sincerely believe they will not afford nearly as much comfort as these.

Rubbers Must Be Correctly Fitted to Give Good Service.

High heel rubbers must be worn over high heel shoes and low heel rubbers over low heel shoes. Rubbers too short or too narrow, will break at the sole; if too large, they will wrinkle and crack. Rubbers should be kept clean and in a dark place when not in use. Oil, milk or grease of any kind will ruin rubber.

Double-Body

Our Own Trade Mark Registered in the U.S. Patent Office

Wool Union Suits Cotton

Our Double-Body! The Big Idea Is Its Construction

For Greater Protection and More Warmth for Less Money.

Double-Body is our own idea of how underwear should be made for men who must have a lot of protection from cold weather. The two separate thicknesses of fabric in the body afford more protection against cold than other brands of underwear, even though the other may be made of equally as good yarn. The single thickness of fabric in the arms and legs, as in all underwear, permits the freedom of movement and in no way does it tend toward binding the active man.

Double-Body is highly popular with railroad men, farmers, lumbermen and, in fact, any man who must be outdoors a great part of the time, no matter what the condition of the weather. Popular from the angle of price, because it's economical. When a man wears Double-Body he is well protected and does not find it necessary to dress in excess with heavier and more costly outer apparel.

Why These Silks Are Popular

Artificial or fiber silk on its own merits has won a prominent place among the world's better products. Dress materials of very fine texture and beautiful design are being manufactured from this wonderful, high luster, silky yarn. The enormous growth in its use, comprising, as it does today, more than half the silk trade of this country is proof of its great desirability for many purposes. Its more moderate price combined with the beautiful appearance makes it an increasingly important feature in dress goods and wearing apparel.

Artificial silk is made by chemically dissolving certain vegetable products and passing the solution through very fine tubes forming filaments very much like those of the silk worms. These filaments are hardened and spun into yarn. Artificial silk has excellent wearing qualities and is almost as strong and elastic as real silk. It requires more care in washing, and simple directions for this purpose are enclosed with our shipments.

Conestogo Feather Tickings
Renowned for Excellence

Exceptional Values

We do not guarantee our tickings to be featherproof, as experience has shown us that no ticking is absolutely featherproof. Some feathers have quills which are almost like needles and these will work through the best of tickings. Ticking can be made more resistant to feathers by waxing the wrong side of the ticking with beeswax or paraffin, or by the use of an interlining such as our 36N2215 or 36N1861 listed on this page.

Blue Stripes

Each number will satisfy a distinct demand. You will agree with us that these tickings are the finest that you have ever seen. Our Tiger Rose quality is made specially for Sears, Roebuck and Co. in a herringbone weave and we especially recommend this number. All numbers are made from fine cotton yarns which are bleached or dyed before weaving, thus insuring fast colors.
